

## Type series FZA / FZZA / FZDA

65 – 3000 W with cover

FZA 300x45

Cemented wirewound tubular fixed resistor in one-, two- or three-tubes design, degree of protection IP20 if mounted on an appropriate surface, with side-panels and perforated cover. Fixing parallel to mounting surface. Connections at screw clips at the resistor tube.

<sup>①</sup> if mounted on an appropriate surface

## Technologies

- low price version protected against access to hazardous parts
- connections at screw clips at the resistor
- wall mounting or mounting on switch cabinets
- adjustable clips available

The given power values are valid for 100%DCF (continuous dissipation) at an ambient temperature of max. 40°C and a surface temperature (ST) of 300°C. The values can be increased by the factor 1,3. Then the ST will increase up to approx. 350°C.

The given power values can be essentially increased during short time operation as a function of the duty cycle factor (DCF). The peak power can be easily calculated. Just multiply the values by the corresponding overload factors (OLF) of this table:

DCF	60%	40%	25%	15%	6%
OLF	1,5	2,2	3,2	5,0	9,5

These overload factors are valid for a total cycle time of maximum 120 s

## Application

An important application is the use as damping resistor in switch plants.

Various applications derive from the compact construction form for wall mounting and mounting on or in a switch cabinet or switch plant.

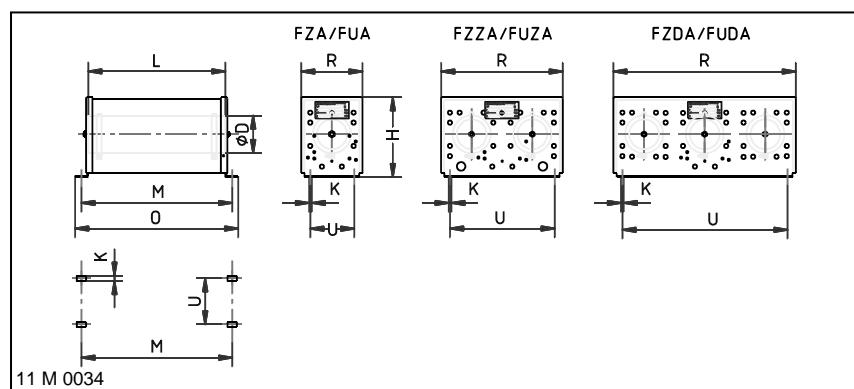

## Special design

- with temperature switch (TS) – type designation then FZ.AQ, connection of the TS at fast-on connections 6,3 x 0,8
- with fast-on clips 6,3 x 0,8

## Electrical and mechanical data
